# SUBJECT INDEX

	PAGE
<b>Celestial mechanics</b>	
On the origin of the commensurabilities amongst the satellites of Saturn—II. <i>A. T. Sinclair</i>	165
<b>Comets</b>	
Hydrodynamics of the H <sub>2</sub> O comet, <i>Max K. Wallis</i>	181
<b>Cosmic rays</b>	
An energy-dependent confinement model for galactic cosmic rays, <i>Jonathan A. Holmes</i>	155
<b>Cosmology</b>	
Variation of radio source counts with direction, for the 3CR and 4C surveys, <i>T. J. Pearson</i>	249
The analysis of quasar samples, <i>J. C. Jackson</i>	281
Isotropy of radio source populations from comparison of number-flux density curves, <i>Leslie M. Golden</i>	383
Variations in the primordial helium abundance, <i>G. R. Gislér, E. R. Harrison and M. J. Rees</i>	663
<b>Data reduction</b>	
Least squares adjustment with relatively large observation errors, inaccurate initial approximations, or both, <i>Heinrich Eichhorn and Warren G. Clary</i>	425
Numerical experiments concerning the determination of the orbits of close visual doubles considering second order terms in the observing errors, <i>Heinrich Eichhorn and Warren G. Clary</i>	433
<b>Galactic structure and stellar dynamics</b>	
Dynamical models for the formation and evolution of spherical galaxies, <i>Richard B. Larson</i>	585
The structure of barred stellar systems, <i>C. Hunter</i>	633
<b>Galaxies</b>	
Radio source structure, clusters of galaxies and the complex sources, <i>Tony Hooley</i>	259
Dynamical models for the formation and evolution of spherical galaxies, <i>Richard B. Larson</i>	585
The structure of barred stellar systems, <i>C. Hunter</i>	633
Variable stars in the Large Magellanic Cloud—II. <i>E. M. Lindsay</i>	703
<b>Interstellar medium</b>	
The ionization rate in interstellar clouds, <i>M. V. Penston</i>	21P
<b>Meteors</b>	
The influx of visual sporadic meteors, <i>David W. Hughes</i>	339
The mass distribution of radio meteors and the full-wave scattering theory, <i>J. Jones and H. G. Collins</i>	529
<b>Nebulae—gaseous</b>	
Photographic surface photometry of the nebulae surrounding V380 Ori and R Mon, <i>M. T. Brück</i>	123
The structure of four 1612 MHz OH emission sources, <i>M. R. W. Mashadar, R. S. Booth and R. D. Davies</i>	561
The structure of the Crab Nebula—IV. The variation of polarization with wavelength, <i>A. S. Wilson</i>	617
5 GHz observations of six OH objects, <i>Stella Harris</i>	29P
<b>Nebulae—planetary</b>	
A confusing radio source near the planetary nebula IC 2149, <i>Gopal Sistla and May A. Kaftan-Kassim</i>	17P
<b>Physical processes</b>	
Radiative transfer in spherically symmetric systems—III. Fundamentals of line formation, <i>P. B. Kunasz and D. G. Hummer</i>	19
Radiative transfer in spherically symmetric systems—IV. Solution of the line transfer problem with radial velocity fields, <i>P. B. Kunasz and D. G. Hummer</i>	57
An oblique rotator model for DQ Herculis, <i>G. T. Bath, W. D. Evans and J. E. Pringle</i>	113
An energy-dependent confinement model for galactic cosmic rays, <i>Jonathan A. Holmes</i>	155
Hydrodynamics of the H <sub>2</sub> O comet, <i>Max K. Wallis</i>	181
The theory of finite-amplitude overstability and its application to periodic motions in sunspots, <i>R. Van der Borgh</i>	191
The nature of microturbulence in the solar photosphere, <i>Alistair M. Wilson and Frederick J. Guidry</i>	219

	PAGE
The scattering of resonance-line radiation in the limit of large optical depth—II. Reflection and transmission of radiation incident upon a slab, <i>J. Patrick Harrington</i> ...	373
Hot pulsar magnetospheres, <i>R. N. Henriksen and D. R. Rayburn</i> ...	409
Pulse broadening due to multiple scattering in the interstellar medium—III. <i>I. P. Williamson</i>	499
Models of extragalactic radio sources with a continuous energy supply from a central object, <i>P. A. G. Scheuer</i> ...	513
The mass distribution of radio meteors and the full-wave scattering theory, <i>J. Jones and J. G. Collins</i> ...	529
Magnetic braking by a stellar wind—IV. The effect of different poloidal field structures, <i>I. Okamoto</i> ...	683
The ionization rate in interstellar clouds, <i>M. V. Penston</i> ...	21P
<b>Planetary system</b>	
On the origin of the commensurabilities amongst the satellites of Saturn—II. <i>A. T. Sinclair</i>	165
An investigation of the motion of zodiacal dust particles—I. Radial velocity measurements on Fraunhofer line profiles, <i>T. R. Hicks, B. H. May and N. K. Reay</i> ...	439
On the origin of the asteroids, <i>W. McD. Napier and R. J. Dodd</i> ...	469
<b>Pulsars</b>	
Hot pulsar magnetospheres, <i>R. N. Henriksen and D. R. Rayburn</i> ...	409
Pulse broadening due to multiple scattering in the interstellar medium—III. <i>I. P. Williamson</i>	499
The suspected periodicity in the radio frequency spectrum of PSR 0329+54, <i>D. A. Jones and A. G. Lyne</i> ...	39P
<b>Radio astronomy</b>	
Observations of ten extragalactic radio sources with very steep spectra, <i>A. Slingo</i> ...	101
Optical identifications for 45 radio sources based on accurate positions, <i>D. G. Hoskins, H. S. Murdoch, R. L. Adgie, J. H. Crouther and H. Gent</i> ...	235
Variation of radio source counts with direction, for the 3CR and 4C surveys, <i>T. J. Pearson</i> ...	249
Radio source structure, clusters of galaxies and the complex sources, <i>Tony Hooley</i> ...	259
The analysis of quasar samples, <i>J. C. Jackson</i> ...	281
Observations of Cygnus A with the 5-km radio telescope, <i>P. J. Hargrave and M. Ryle</i> ...	305
The spectrum of the galactic non-thermal background radiation—I. Observations at 151.5 and 408 MHz, <i>G. Sironi</i> ...	345
The spectrum of the galactic non-thermal background radiation—II. Observations at 408, 610 and 1407 MHz, <i>A. S. Webster</i> ...	355
Isotropy of radio source populations from comparison of number-flux density curves, <i>Leslie M. Golden</i> ...	383
Non-aligned components in extragalactic radio sources, <i>Anthony Harris</i> ...	449
Pulse broadening due to multiple scattering in the interstellar medium—III. <i>I. P. Williamson</i>	499
Models of extragalactic radio sources with a continuous energy supply from a central object, <i>P. A. G. Scheuer</i> ...	513
The structure of four 1612 MHz OH emission sources, <i>M. R. W. Masheder, R. S. Booth and R. D. Davies</i> ...	561
The structure of the Crab Nebula—IV. The variation of polarization with wavelength, <i>A. S. Wilson</i> ...	617
A search for flux density variations in the central components of the extended extragalactic radio sources Virgo A and 3C 111, <i>B. L. Fanaroff</i> ...	1P
Initial results from a radio continuum survey of the area around NGC 7331 and Stephen's Quintet, <i>A. R. Gillespie</i> ...	11P
A confusing radio source near the planetary nebula IC 2149, <i>Gopal Sista and May A. Kaftan-Kasim</i> ...	17P
5 GHz observations of six OH objects, <i>Stella Harris</i> ...	29P
The suspected periodicity in the radio frequency spectrum of PSR 0329+54, <i>D. A. Jones and A. G. Lyne</i> ...	39P
<b>Spectroscopy</b>	
Radiative transfer in spherically symmetric systems—III. Fundamentals of line formation, <i>P. B. Kunasz and D. G. Hummer</i> ...	19
Radiative transfer in spherically symmetric systems—IV. Solution of the line transfer problem with radial velocity fields, <i>P. B. Kunasz and D. G. Hummer</i> ...	57
The scattering of resonance-line radiation in the limit of large optical depth—II. Reflection and transmission of radiation incident upon a slab, <i>J. Patrick Harrington</i> ...	373
The free-free transitions of Cl <sup>-</sup> , <i>T. L. John, D. J. Morgan and D. Davies</i> ...	9P

	PAGE
<b>Stars</b>	
The coolest Wolf-Rayet stars, <i>B. Louise Webster and I. S. Glass</i> ... ..	491
<b>Stars—atmospheres of</b>	
The nature of microturbulence in the solar photosphere, <i>Alistair M. Wilson and Frederick J. Guidry</i> ... ..	219
<b>Stars—binary</b>	
An oblique rotator model for DQ Herculis, <i>G. T. Bath, W. D. Evans and J. E. Pringle</i> ...	113
Numerical experiments concerning the determination of the orbits of close visual doubles considering second order terms in the observing errors, <i>Heinrich Eichhorn and Warren G. Clary</i> ... ..	433
<b>Stars—chemical composition of</b>	
The CNO abundances of the CH stars in Omega Centauri, <i>R. A. Bell and R. J. Dickens</i> ...	89
Metal abundance and the luminosities of cepheids, <i>S. C. B. Gascoigne</i> ... ..	25P
<b>Stars—clusters of</b>	
The CNO abundances of the CH stars in Omega Centauri, <i>R. A. Bell and R. J. Dickens</i> ...	89
<b>Stars—magnetic fields in</b>	
The intrinsic linear polarization of 53 Camelopardalis and $\alpha^2$ Canum Venaticorum, <i>James C. Kemp and Ramon D. Wolstencroft</i> ... ..	1
An oblique rotator model for DQ Herculis, <i>G. T. Bath, W. D. Evans and J. E. Pringle</i> ...	113
Magnetic braking by a stellar wind—IV. The effect of different poloidal field structures, <i>I. Okamoto</i> ... ..	683
<b>Stars—photometry of</b>	
Ultra-violet photometry of early type stars from TD1 satellite observations, <i>K. Nandy, G. I. Thompson and C. M. Humphries</i> ... ..	297
<b>Stars—spectroscopy of</b>	
The Hy-absolute magnitude calibration, <i>L. Balona and D. Crampton</i> ... ..	203
A spectroscopic survey of Southern Hemisphere white dwarfs—IV. Radial velocities and space motions, <i>Gary Wegner</i> ... ..	271
On the strength of H $\alpha$ in the O-stars, <i>Wayne Osborn</i> ... ..	463
A new helium variable, <i>L. Balona and W. L. Martin</i> ... ..	35P
<b>Stars—variable</b>	
Emission-line variability in quiescent flare stars, <i>Bernard W. Bopp</i> ... ..	79
An oblique rotator model for DQ Herculis, <i>G. T. Bath, W. D. Evans and J. E. Pringle</i> ...	113
The luminosities of the Beta Canis Majoris variables, <i>D. H. P. Jones and R. R. Shobbrook</i> ...	649
Observations of rapid blue variables—XIII. Rapid pulsations in VW Hyi during outburst, <i>Brian Warner and A. J. Brickhill</i> ... ..	673
Variable stars in the Large Magellanic Cloud—II. <i>E. M. Lindsay</i> ... ..	703
Metal abundance and the luminosities of cepheids, <i>S. C. B. Gascoigne</i> ... ..	25P
A new helium variable, <i>L. Balona and W. L. Martin</i> ... ..	35P
<b>Stars—velocities of</b>	
A spectroscopic survey of Southern Hemisphere white dwarfs—IV. Radial velocities and space motions, <i>Gary Wegner</i> ... ..	271
<b>Sun</b>	
The theory of finite-amplitude overstability and its application to periodic motions in sunspots, <i>R. van der Borgh</i> ... ..	191
The nature of microturbulence in the solar photosphere, <i>Alistair M. Wilson and Frederick J. Guidry</i> ... ..	219
Observations of the solar spectrum in the region 150 Å to 870 Å emitted from the disk and above the limb, <i>J. G. Firth, F. F. Freeman, A. H. Gabriel, B. B. Jones, C. Jordan, C. R. Negus, D. B. Shenton and R. F. Turner</i> ... ..	543

PAGE

## Ultra-violet astronomy

- Ultra-violet photometry of early type stars from TD1 satellite observations, *K. Nandy, G. I. Thompson and C. M. Humphries* ... .. 297
- Observations of the solar spectrum in the region 150 Å to 870 Å emitted from the disk and above the limb, *J. G. Firth, F. F. Freeman, A. H. Gabriel, B. B. Jones, C. Jordan, C. R. Negus, D. B. Shenton and R. F. Turner* ... .. 543

## X-ray astronomy

- Fluctuations in the X-ray background, *P. A. G. Scheuer* ... .. 329

## Zodiacal light

- An investigation of the motion of zodiacal dust particles—I. Radial velocity measurements on Fraunhofer line profiles, *T. R. Hicks, B. H. May and N. K. Reay* ... .. 439

MONTHLY NOTICES  
OF THE  
ROYAL ASTRONOMICAL SOCIETY

CONTAINING  
PAPERS PUBLISHED IN THE PERIOD  
1974 APRIL TO JUNE

VOL. 167

Published for the Royal Astronomical Society by  
Blackwell Scientific Publications  
Oxford London Edinburgh Melbourne

# AUTHOR INDEX

	PAGE
<i>Ables, J. G., Slee, O. B., Batchelor, R. A., Krishna-Mohan, S., Venugopal, V. R. and Swarup, G.</i> , Simultaneous observations of pulsar intensity variations at Parkes and Ootacamund	31
<i>Aitken, David K. and Jones, Barbara</i> , Observation of Ne II in the compact H II region G333-6-0.2	11P
<i>Alexander, J. B. and Branch, David</i> , Photoelectric measurements of the Swan band of O <sub>2</sub> in some G and K stars	539
<i>Allen, D. A. and Glass, I. S.</i> , Infrared photometry of southern emission-line stars	337
<i>Allen, L. R., Brown, R. Hanbury and Davis, J.</i> , The angular diameters of 32 stars	121
<i>Andrews, P. J. and Wood, Roger</i> , The 1968 type II supernova in NGC 5236	13
<i>Andrews, P. J.</i> , Photometry of the eclipsing system AR Pavonis	635
<i>Austin, T. B. and Peach, J. V.</i> , Studies of rich clusters of galaxies—I. Galaxy counts for nine clusters of intermediate redshift and the angular diameter-redshift relation	437
<i>Baker, J. R. and Wilkinson, A.</i> , The linear polarization of part of the northern sky at 49-cm wavelength	581
<i>Balona, L. A. and Feast, M. W.</i> , A new determination from OB stars of the galactic rotation constants and the distance to the galactic centre	621
<i>Batchelor, R. A.</i> (see Ables, J. G.)	
<i>Bath, G. T., Evans, W. D. and Papaloizou, J.</i> , A simple model of fluctuations in accretion discs	7P
<i>Bingham, R. G. and Martin, W. L.</i> , Analysis of composite spectra—the ultra-violet excess of stars in globular clusters	137
<i>Bonnor, W. B.</i> , Evolution of inhomogeneous cosmological models	55
<i>Bopp, Bernard W. and Grupsmith, Gerald</i> , Photoelectric spectrum scans and Coudé spectroscopy of HD 153919 (=2U 1700-37)	65P
<i>Branch, David and Alexander, J. B.</i> , Photoelectric measurements of the Swan band of C <sub>2</sub> in some G and K stars	539
<i>Brown, R. Hanbury</i> (see Allen, L. R.)	
<i>Brown, R. Hanbury, Davis, J., Lake, R. J. W. and Thompson, R. J.</i> , The effects of limb darkening on measurements of angular size with an intensity interferometer	475
<i>Browne, I. W. A. and Stannard, D.</i> , Radio observations of QSOs in the direction of Abell clusters of galaxies...	37P
<i>Brownrigg, D. R. K. and Hockney, R. W.</i> , Effect of Population II stars and three-dimensional motion on spiral structure	351
<i>Cannon, R. D. and Kontizas, Mary</i> , The turn-off point of Omega Centauri	51P
<i>Cannon, R. D.</i> , Photometry of southern globular clusters—III. Bright stars in 47 Tucanae, NGC 6397 and NGC 288	551
<i>Chandrasekhar, S. and Miller, John C.</i> , On slowly rotating homogeneous masses in general relativity	63
<i>Clarke, D. and McLean, I. S.</i> , Observations of the linear polarization in the H $\beta$ emission feature of $\gamma$ Cas	27P
<i>Cotton, W. D. and Wills, D.</i> , Radio observations of the 'double QSO' 4C 11.50	75P
<i>Cuperman, S. and Sternlieb, A.</i> , Effect of mass loss by stellar winds on the pre-main sequence stage of stellar evolution	183
<i>Dainty, J. C. and Scaddan, R. J.</i> , A coherence interferometer for direct measurement of the atmospheric transfer function	69P
<i>Davis, J.</i> (see Allen, L. R.)	
<i>Davis, J.</i> (see Brown, R. Hanbury)	
<i>Ebner, H. and Vegt, Chr. de.</i> , A general computer program for the application of the rigorous blockadjustment solution in photographic astrometry	169
<i>Evans, R. G.</i> , Ultraviolet observations of the eclipsing binary star $\delta$ Pictoris from the TD-1A satellite	517
<i>Evans, T. Lloyd</i> , The correlation between the infrared and photographic spectra of RV Tauri stars	17P
<i>Evans, T. Lloyd</i> , Near infrared photometry of globular clusters—II. The metal-rich cluster 47 Tucanae (NGC 104)	393
<i>Evans, W. D.</i> (see Bath, G. T.)	
<i>Fabian, A. and Rowan-Robinson, M.</i> , Fluctuations in the integrated X-ray background	419
<i>Fanaroff, B. L. and Riley, J. M.</i> , The morphology of extragalactic radio sources of high and low luminosity	31P
<i>Feast, M. W. and Balona, L. A.</i> , A new determination from OB stars of the galactic rotation constants and the distance to the galactic centre	621
<i>Feast, M. W. and Glass, I. S.</i> , Infra-red photometry of some old novae	81
<i>Feast, M. W., van Genderen, A. M. and Glass, I. S.</i> , The long-period, high-latitude, eclipsing systems V748 Cen (=Cen X-4?) and BL Tel	283

	PAGE
<i>Fellgett, P.</i> , Performance of Schmidt and field-corrected telescopes ... ..	83P
<i>Finn, G. D. and Kemp, J. C.</i> , The linear polarization of 53 Camelopardalis ... ..	375

## SUBJECT INDEX

### Astrometry

A general computer program for the application of the rigorous blockadjustment solution in photographic astrometry, <i>Chr. de Vegt and H. Ebner</i> ... ..	169
---	-----

### Celestial mechanics

On slowly rotating homogeneous masses in general relativity, <i>S. Chandrasekhar and John C. Miller</i> ... ..	63
--	----

**Cosmic rays**

- The leakage of cosmic rays from the galaxy, *I. McIvor and J. Skilling* ... .. 49  
 On cosmic ray diffusion and anisotropy, *J. Skilling, I. McIvor and J. A. Holmes* ... .. 87P

**Cosmology**

- Evolution of inhomogeneous cosmological models, *W. B. Bonnor* ... .. 55  
 Studies of rich clusters of galaxies—I. Galaxy counts for nine clusters of intermediate redshift and the angular diameter-redshift relation, *T. B. Austin and J. V. Peach* ... .. 437

**Data reduction**

- A general computer program for the application of the rigorous blockadjustment solution in photographic astrometry, *Chr. de Veig and H. Ebner* ... .. 169

**Galactic structure and stellar dynamics**

- Effect of Population II stars and three-dimensional motion on spiral structure, *R. W. Hockney and D. R. K. Brownrigg* ... .. 351  
 A new determination from OB stars of the galactic rotation constants and the distance to the galactic centre, *L. A. Balona and M. W. Feast* ... .. 621

**Galaxies**

- A radio survey of interacting galaxies, *Alan E. Wright* ... .. 251  
 Flux densities of bright galaxies at 2700 and 5000 MHz, *Alan E. Wright* ... .. 273  
 Studies of rich clusters of galaxies—I. Galaxy counts for nine clusters of intermediate redshift and the angular diameter-redshift relation, *T. B. Austin and J. V. Peach* ... .. 437  
 Optical variability of three Seyfert galaxies, *H. Netzer* ... .. 1P  
 Radio observations of QSOs in the direction of Abell clusters of galaxies, *D. Stannard and I. W. A. Browne* ... .. 37P

**General relativity**

- On slowly rotating homogeneous masses in general relativity, *S. Chandrasekhar and John C. Miller* ... .. 63  
 On the analogy between neutron star models and isothermal gas spheres and their general relativistic instability, *S. Yabushita* ... .. 95

**Infrared astronomy**

- Infrared photometry of some old novae, *M. W. Feast and I. S. Glass* ... .. 81  
 An infrared survey of RW Aurigae stars, *I. S. Glass and M. V. Penston* ... .. 237  
 Infrared photometry of southern emission-line stars, *D. A. Allen and I. S. Glass* ... .. 337  
 Near-infrared photometry of globular clusters-II. The metal-rich cluster 47 Tucanae (NGC 104), *T. Lloyd Evans* ... .. 393

**Instruments and techniques**

- A new wide-field triple lens paraboloid field corrector, *C. G. Wynne* ... .. 189  
 Pupil imagery in astronomical spectrographs, *C. F. W. Harmer* ... .. 311  
 The effects of limb darkening on measurements of angular size with an intensity interferometer, *R. Hanbury Brown, J. Davis, R. J. W. Lake and R. J. Thompson* ... .. 475  
 A coherence interferometer for direct measurement of the atmospheric transfer function, *J. C. Dainty and R. J. Scaddan* ... .. 69P  
 Performance of Schmidt and field-corrected telescopes, *P. Fellgett* ... .. 83P

**Interstellar medium**

- Simultaneous observations of pulsar intensity variations at Parkes and Ootacamund, *O. B. Slee, J. G. Ables, R. A. Batchelor, S. Krishna-Mohan, V. R. Venugopal and G. Swarup* ... 31  
 The leakage of cosmic rays from the galaxy, *I. McIvor and J. Skilling* ... .. 49  
 Local hydrogen gas and the background Lyman-alpha pattern, *Max K. Wallis* ... .. 103  
 Incremental polarization of starlight at different locations in the galaxy, *Lee A. Fowler and Martin Harwit* ... .. 227  
 Characteristics of the local galactic magnetic field determined from background polarization surveys, *A. Wilkinson and F. G. Smith* ... .. 593  
 On cosmic ray diffusion and anisotropy, *J. Skilling, I. McIvor and J. A. Holmes* ... .. 87P

**Nebulae—gaseous**

- The origin of the magnetic field and relativistic particles in the Crab Nebula, *M. J. Rees and J. E. Gunn* ... .. 1

**Nebulae—gaseous—continued**

PAGE

- On the interpretation of continuum flux observations from thermal radio sources—I. Continuum spectra and brightness contours, *M. Salem and M. J. Seaton* ... 493
- On the interpretation of continuum flux observations from thermal radio sources—II. Three-dimensional models, *M. Salem* ... 511
- Observation of Ne II in the compact H II region G333-6-0.2, *David K. Aitken and Barbara Jones* 11P

**Nebulae—planetary**

- The heating of young planetary nebulae by trapped Lyman-radiation, *D. George* ... 485

**Neutron stars**

- On the analogy between neutron star models and isothermal gas spheres and their general relativistic instability, *S. Yabushita* ... 95

**Physical processes**

- The origin of the magnetic field and relativistic particles in the Crab Nebula, *M. J. Rees and J. E. Gunn* ... I
- The leakage of cosmic rays from the galaxy, *I. McIvor and J. Skilling*... 49
- Gravity-darkening in stars for general rotation laws, *Robert Connors Smith and Richard Worley* 199
- A lower limit to Jeans' escape rate, *Peter G. Gross* ... 215
- Force-free pulsar magnetosphere—I. The steady, axisymmetric theory for the charge-separated plasma, *I. Okamoto* ... 457
- The heating of young planetary nebulae by trapped Lyman-radiation, *D. George* ... 485
- The decay of magnetic fields in stars, *G. A. E. Wright* ... 527
- A simple model of fluctuations in accretion discs, *G. T. Bath, W. D. Evans and J. Papaloizou* 7P
- X-ray emission from cataclysmic variable stars, *Brian Warner* ... 47P
- On cosmic ray diffusion and anisotropy, *J. Skilling, I. McIvor and J. A. Holmes* ... 87P

**Planetary system**

- A lower limit to Jeans' escape rate, *Peter G. Gross* ... 215

**Polarization of starlight**

- Incremental polarization of starlight at different locations in the galaxy, *Lee A. Fowler and Martin Harwit* ... 227
- The linear polarization of 53 Camelopardalis, *G. D. Finn and J. C. Kemp* ... 375
- Observations of the linear polarization in the H $\beta$  emission feature of  $\gamma$  Cas, *D. Clarke and I. S. McLean* ... 27P

**Pulsars**

- Simultaneous observations of pulsar intensity variations at Parkes and Ootacamund, *O. B. Slee, J. G. Ables, R. A. Batchelor, S. Krishna-Mohan, V. R. Venugopal and G. Swarup*... 31
- Force-free pulsar magnetosphere—I. The steady, axisymmetric theory for the charge-separated plasma, *I. Okamoto* ... 457
- Counter-rotation of polarization vectors in pulsars, *F. G. Smith* ... 43P

**Quasars**

- Radio observations of QSOs in the direction of Abell clusters of galaxies *D. Stannard and I. W. A. Browne* ... 37P
- Radio observations of the 'double QSO' 4C 11.50 *D. Wills and W. D. Cotton* ... 75P
- Spectroscopic observations of eight QSO candidates among Markarian objects, *D. Wills and Beverley J. Wills* ... 79P

**Radio astronomy**

- Simultaneous observations of pulsar intensity variations at Parkes and Ootacamund, *O. B. Slee, J. G. Ables, R. A. Batchelor, S. Krishna-Mohan, V. R. Venugopal and G. Swarup*... 31
- A radio survey of interacting galaxies, *Alan E. Wright* ... 251
- Flux densities of bright galaxies at 2700 and 5000 MHz, *Alan E. Wright* ... 273
- Structure of 3C 139.2 3C 154, 3C 172 and 3C 215 at 327 MHz, *V. K. Kapahi, Gopal-Krishna and M. N. Joshi* ... 299
- On the interpretation of continuum flux observations from thermal radio sources—I. Continuum spectra and brightness contours, *M. Salem and M. J. Seaton* ... 493
- On the interpretation of continuum flux observations from thermal radio sources—II. Three-dimensional models, *M. Salem* ... 511

**Radio astronomy—continued**

	PAGE
The linear polarization of part of the northern sky at 49-cm wavelength, <i>J. R. Baker and A. Wilkinson</i> ... ..	581
Characteristics of the local galactic magnetic field determined from background polarization surveys, <i>A. Wilkinson and F. G. Smith</i> ... ..	593
Fine structure in radio sources at 81.5 MHz—III. The survey, <i>A. C. S. Readhead and A. Hewish</i> (Summary of <i>Mem. R. astr. Soc.</i> 78, 1, 1974) ... ..	663
The morphology of extragalactic sources of high and low luminosity, <i>B. L. Fanaroff and J. M. Riley</i> ... ..	31P
Radio observations of QSOs in the direction of Abell clusters of galaxies, <i>D. Stannard and I. W. A. Browne</i> ... ..	37P
High radio polarization of 4C 47.08, <i>R. W. Porcas, A. M. Treverton and A. Wilkinson</i> ... ..	41P
Counter-rotation of polarization vectors in pulsars, <i>F. G. Smith</i> ... ..	43P
Radio observations of the 'double QSO' 4C 11.50, <i>D. Wills and W. D. Cotton</i> ... ..	75P

**Spectroscopy**

Energy levels of Ca VII from observations of RR Telescopii, <i>A. D. Thackeray</i> ... ..	87
Pupil imagery in astronomical spectrographs, <i>C. F. W. Harmer</i> ... ..	311

**Stars**

Gravity-darkening in stars for general rotation laws, <i>Robert Connon Smith and Richard Worley</i> ... ..	199
--	-----

**Stars—angular diameters of**

The angular diameters of 32 stars, <i>R. Hanbury Brown, J. Davis and L. R. Allen</i> ... ..	121
The effects of limb darkening on measurements of angular size with an intensity interferometer, <i>R. Hanbury Brown, J. Davis, R. J. W. Lake and R. J. Thompson</i> ... ..	475

**Stars—atmospheres of**

Effect of mass loss by stellar winds on the pre-main sequence stage of stellar evolution, <i>S. Cuperman and A. Sternlieb</i> ... ..	183
A model atmosphere analysis of the metal-rich giant Iota Draconis, <i>P. M. Williams</i> ... ..	359
Force-free pulsar magnetosphere—I. The steady, axisymmetric theory for the charge-separated plasma, <i>I. Okamoto</i> ... ..	457
Atmospheric properties of short-period cepheids and the nature of the beat cepheids, <i>Edward G. Schmidt</i> ... ..	613

**Stars—binary**

The long-period, high-latitude, eclipsing systems V748 Cen (= Cen X-4?) and BL Tel, <i>A. M. van Genderen, I. S. Glass and M. W. Feast</i> ... ..	283
Spectroscopy of the eclipsing variable AR Pavonis, <i>A. D. Thackeray and J. B. Hutchings</i> ... ..	319
The light curve and orbital elements of XZ Sgr, <i>G. F. G. Knipe</i> ... ..	369
Ultraviolet observations of the eclipsing binary star $\delta$ Pictoris from the TD-1A satellite, <i>R. G. Evans</i> ... ..	517
Photometry of the eclipsing system AR Pavonis, <i>P. J. Andreus</i> ... ..	635
On the evolutionary scheme WUMA $\rightarrow$ CV $\rightarrow$ Type I SN, <i>Brian Warner</i> ... ..	61P

**Stars—chemical composition of**

The carbon isotope ratio in Arcturus, <i>R. Griffin</i> ... ..	645
--	-----

**Stars—clusters of**

Analysis of composite spectra—the ultra-violet excess of stars in globular clusters, <i>R. G. Bingham and W. L. Martin</i> ... ..	137
Near-infrared photometry of globular clusters—II. The metal-rich cluster 47 Tucanae (NGC 104), <i>T. Lloyd Evans</i> ... ..	393
CN strengths in M67 and NGC 188, <i>B. E. J. Pagel</i> ... ..	413
Photometry of southern globular clusters—III. Bright stars in 47 Tucanae, NGC 6397 and NGC 288, <i>R. D. Cannon</i> ... ..	551
The turn-off point of Omega Centauri, <i>R. D. Cannon and Mary Kontizas</i> ... ..	51P

**Stars—magnetic fields in**

On the distortion of magnetic stars and their inferred magnetic fields, <i>J. J. Monaghan</i> ... ..	163
The decay of magnetic fields in stars, <i>G. A. E. Wright</i> ... ..	527

	PAGE
<b>Stars—photometry of</b>	
Infrared photometry of some old novae <i>M. W. Feast and I. S. Glass</i> ... ..	81
Infrared photometry of southern emission-line stars, <i>D. A. Allen and I. S. Glass</i> ... ..	337
Near-infrared photometry of globular clusters—II. The metal-rich cluster 47 Tucanae (NGC 104), <i>T. Lloyd Evans</i> ... ..	393
Photometry of southern globular clusters—III. Bright stars in 47 Tucanae, NGC 6397 and NGC 288, <i>R. D. Cannon</i> ... ..	551
Photometry of the eclipsing system AR Pavonis, <i>P. J. Andrews</i> ... ..	635
<b>Stars—spectroscopy of</b>	
Energy levels of Ca VII from observations of RR Telescopii, <i>A. D. Thackeray</i> ... ..	87
Analysis of composite spectra—the ultra-violet excess of stars in globular clusters, <i>R. G. Bingham and W. L. Martin</i> ... ..	137
Spectroscopy of the eclipsing variable AR Pavonis, <i>A. D. Thackeray and J. B. Hutchings</i> ... ..	319
CN strengths in M67 and NGC 188, <i>B. E. J. Pagel</i> ... ..	413
Photoelectric measurements of the Swan band of C <sub>2</sub> in some G and K stars, <i>J. B. Alexander and David Branch</i> ... ..	539
The correlation between the infrared and photographic spectra of RV Tauri stars, <i>T. Lloyd Evans</i> ... ..	17P
Spectroscopic observations of eight QSO candidates among Markarian objects, <i>D. Wills and Beverley J. Wills</i> ... ..	79
Photoelectric spectrum scans and Coudé spectroscopy of HD 153919 (= 2U 1700-37), <i>Bernard W. Bopp and Gerald Grupsmith</i> ... ..	69P
<b>Stars—structure and evolution of</b>	
Effect of mass loss by stellar winds on the pre-main sequence stage of stellar evolution, <i>S. Cupperman and A. Sternlieb</i> ... ..	183
On the evolutionary scheme WUMa → CV → Type I SN, <i>Brian Warner</i> ... ..	61P
<b>Stars—variable</b>	
The 1968 type II supernova in NGC 5236, <i>Roger Wood and P. J. Andrews</i> ... ..	13
Infrared photometry of some old novae, <i>M. W. Feast and I. S. Glass</i> ... ..	81
On the optical stability of X-Persei, <i>Alfred Frohlich and Isaac Nevo</i> ... ..	221
An infrared survey of RW Aurigae stars, <i>I. S. Glass and M. V. Penston</i> ... ..	237
Atmospheric properties of short-period cepheids and the nature of the beat cepheids, <i>Edward G. Schmidt</i> ... ..	613
A simple model of fluctuations in accretion discs, <i>G. T. Bath, W. D. Evans and J. Papaloizou</i> ... ..	7P
On the light curve of HD 77581, <i>D. T. Wickramasinghe and J. Whelan</i> ... ..	21P
X-ray emission from cataclysmic variable stars, <i>Brian Warner</i> ... ..	47P
On the evolutionary scheme WUMa → CV → Type I SN, <i>Brian Warner</i> ... ..	61P
<b>Ultra-violet astronomy</b>

## SUBJECT INDEX

	PAGE
<b>Celestial mechanics</b>	
Variational principles for the ellipticity of slowly rotating configurations, <i>A. R. P. Rau</i> ...	273
The equilibrium of an interstellar magnetic disk, <i>D. A. Parker</i> ... ..	331
Radial pulsations of finite isothermal gas spheres, <i>L. G. Taff and H. M. Van Horn</i> ...	427
<b>Cosmology</b>	
Galactic motion as sources for heating of the intergalactic and intracluster medium, <i>Lee Schipper</i> ... ..	21
Galaxy formation without primordial turbulence: mechanisms for generating cosmic vorticity, <i>James Binney</i> ... ..	73
Black holes in the early Universe, <i>B. J. Carr and S. W. Hawking</i> ... ..	399
A discrete source model of the microwave background, <i>M. Rowan-Robinson</i> ... ..	45P
<b>Galactic structure and stellar dynamics</b>	
Local density gradient and galactic parameters determined from nearby stars, <i>Carlos Cruz-González</i> ... ..	41
The bar modes of uniformly rotating stellar disks, <i>A. J. Kalnajs and E. Athanassoula-Georgala</i> ...	287
<b>Galaxies</b>	
Radio emission associated with the brightest galaxies in clusters, <i>B. N. G. Guthrie</i> ... ..	15
Galactic motion as sources for heating of the intergalactic and intracluster medium, <i>Lee Schipper</i> ... ..	21
Galaxy formation without primordial turbulence: mechanisms for generating cosmic vorticity, <i>James Binney</i> ... ..	73
Spectrophotometry of six Seyfert nuclei, <i>W. L. Martin</i> ... ..	109
The X-ray spectrum of Cygnus-A, <i>M. S. Longair and A. P. Willmore</i> ... ..	479
Observations of M82 at 5 GHz with the 5-km radio telescope, <i>P. J. Hargrave</i> ... ..	491
Studies of rich clusters of galaxies—II. The structure and luminosity function of the cluster A1413, <i>T. B. Austin and J. V. Peach</i> ... ..	591

	PAGE
Photometry of AP Lib and PKS 0521-36, <i>P. J. Andrews, I. S. Glass and T. G. Hawarden</i>	7P
On the correlation between <i>M/L</i> and colour for spiral galaxies, <i>Wallace L. W. Sargent and Beatrice M. Tinsley</i>	19P
Three double emission nebulae, <i>David A. Allen</i>	27P
<b>General relativity</b>	
Black holes in the early Universe, <i>B. J. Carr and S. W. Hawking</i>	399
<b>Infrared astronomy</b>	
Infrared observations of northern emission-line stars, <i>David A. Allen</i>	1
<b>Instruments and techniques</b>	
An attempt to detect a corona around $\beta$ Orionis with an intensity interferometer using linearly polarized light, <i>R. Hanbury Brown, J. Davis and L. R. Allen</i>	93
A new type of crystal spectrometer for solar X-ray studies, <i>R. C. Catura, E. G. Joki, J. C. Bakke, C. G. Rapley and J. L. Culhane</i>	217
On the possibility of detecting photospheric polarization with an interferometer, <i>D. C. Sams and I. D. S. Johnston</i>	463
Photoelectric radial velocities—I. Technique, <i>G. W. van Citters</i>	499
<b>Interstellar medium</b>	
The ratio of total to selective absorption in the Rho Ophiuchi cloud, <i>D. C. B. Whittet</i>	371
The extinction curves of HD 92964 and HD 147889, <i>I. G. van Breda, I. S. Glass and D. C. B. Whittet</i>	551
Radio recombination lines from carbon and possibly heavier elements, <i>A. Pedlar and L. Hart</i>	577
The alignment of interstellar dust clouds, <i>P. B. Hopper and M. J. Disney</i>	639
Interstellar CH and CH <sup>+</sup> from the evaporation of grain mantles, <i>Theodore P. Stecher and David A. Williams</i>	23P
CH and CH <sup>+</sup> in interstellar clouds, <i>Theodore P. Stecher and David A. Williams</i>	51P
<b>Magellanic clouds</b>	
JHKL photometry of LMC stars, <i>I. S. Glass</i>	249
Probable symbiotic and VV Cephei stars in the Magellanic Clouds, <i>M. W. Feast and B. Louise Webster</i>	31P
<b>Meteors</b>	
On the validity of certain approximations in radio meteor echo theory, <i>J. Jones and J. G. Collins</i>	433
<b>Nebulae—gaseous</b>	
The ratio of total to selective absorption in the Rho Ophiuchi cloud, <i>D. C. B. Whittet</i>	371
Low frequency recombination lines from southern nebulae, <i>M. J. Batty</i>	37P
Three double emission nebulae, <i>David A. Allen</i>	27P
<b>Nebulae—planetary</b>	
Three double emission nebulae, <i>David A. Allen</i>	27P
<b>Photometry—non-stellar</b>	
Spectrophotometry of six Seyfert nuclei, <i>W. L. Martin</i>	109
Photometry of AP Lib and PKS 0521-36, <i>P. J. Andrews, I. S. Glass and T. G. Hawarden</i>	7P
<b>Physical processes</b>	
Galactic motion as sources for heating of the intergalactic and intracluster medium, <i>Lee Shipper</i>	21
Galaxy formation without primordial turbulence: mechanisms for generating cosmic vorticity, <i>James Binney</i>	73
Radiation pressure driven mass loss from accretion discs in X-ray binaries, <i>D. T. Wickramasinghe</i>	297
The equilibrium of an interstellar magnetic disk, <i>D. A. Parker</i>	331
Synchrotron emission from particles having a truncated power-law energy spectrum, <i>L. J. Gleeson, M. P. C. Legg and K. C. Westfold</i>	379
Black holes in the early Universe, <i>B. J. Carr and S. W. Hawking</i>	399
Radial pulsations of finite isothermal gas spheres, <i>L. G. Taff and H. M. Van Horn</i>	427
On the validity of certain approximations in radio meteor echo theory, <i>J. Jones and J. G. Collins</i>	433

	PAGE
The evolution of viscous discs and the origin of the nebular variables, <i>D. Lynden-Bell and J. E. Pringle</i> ... ..	603
Interstellar CH and CH <sup>+</sup> from the evaporation of grain mantles, <i>Theodore P. Stecher and David A. Williams</i> ... ..	23P
CH and CH <sup>+</sup> in interstellar clouds, <i>Theodore P. Stecher and David A. Williams</i> ... ..	51P
<b>Pulsars</b>	
Accurate positions and optical studies in nine southern pulsar fields, <i>A. E. Vaughan, M. J. Disney and P. Nicholson</i> ... ..	361
<b>Quasars</b>	
The radio polarization of quasars, <i>R. G. Conway, P. Haves, P. P. Kronberg, D. Stannard, J. P. Vallée and J. F. C. Wardle</i> ... ..	137
Further studies of the optical variability of OJ 287, <i>Alfred Frohlich, Shmuel Goldsmith and Donna Weistrop</i> ... ..	417
Observations of radio sources with an interferometer of 24 km baseline—IV. The angular structures at 408 and 610 MHz of 30 quasars with steep radio spectra, <i>P. N. Wilkinson and P. J. Richards</i> ... ..	515
Radio and optical studies of 4C 11.50, <i>A. N. Argue, R. D. Ekers, B. L. Fanaroff, C. Hazard, M. Ryle, J. R. Shakeshaft, A. Stockton and A. S. Webster</i> ... ..	1P
<b>Radio astronomy</b>	
Radio emission associated with the brightest galaxies in clusters, <i>B. N. G. Guthrie</i> ... ..	15
The radio polarization of quasars, <i>R. G. Conway, P. Haves, P. P. Kronberg, D. Stannard, J. P. Vallée and J. F. C. Wardle</i> ... ..	137
The structure and origin of radio sources with very steep spectra, <i>A. Slingo</i> ... ..	307
Synchrotron emission from particles having a truncated power-law energy spectrum, <i>L. J. Gleeson, M. P. C. Legg and K. C. Westfold</i> ... ..	379
Further studies of the optical variability of OJ 287, <i>Alfred Frohlich, Shmuel Goldsmith and Donna Weistrop</i> ... ..	417
On the validity of certain approximations in radio meteor echo theory, <i>J. Jones and J. G. Collins</i> ... ..	433
The X-ray spectrum of Cygnus-A, <i>M. S. Longair and A. P. Willmore</i> ... ..	479
Observations of M82 at 5 GHz with the 5-km radio telescope, <i>P. J. Hargrave</i> ... ..	491
Observations of radio sources with an interferometer of 24 km baseline—IV. The angular structures at 408 and 610 MHz of 30 quasars with steep radio spectra, <i>P. N. Wilkinson and P. J. Richards</i> ... ..	515
Radio recombination lines from carbon and possibly heavier elements, <i>A. Pedlar and L. Hart</i> ... ..	577
Radio and optical studies of 4C 11.50, <i>A. N. Argue, R. D. Ekers, B. L. Fanaroff, C. Hazard, M. Ryle, J. R. Shakeshaft, A. Stockton and A. S. Webster</i> ... ..	1P
Photometry of AP Lib and PKS 0521-36, <i>P. J. Andrews, I. S. Glass and T. G. Hawarden</i> ... ..	7P
Low frequency recombination lines from southern nebulae, <i>M. J. Batty</i> ... ..	37P
A discrete source model of the microwave background, <i>M. Rowan-Robinson</i> ... ..	45P
<b>Spectroscopy</b>	
Line statistics in the Fe I spectrum, <i>C. W. Allen</i> ... ..	121
Light ions of astrophysical interest—radiative transfer probabilities for C III, N IV, O V and Ne VII, <i>D. G. Hummer and D. W. Norcross</i> ... ..	263
<b>Stars</b>	
The physical properties of the red giants in M67, <i>Wayne Osborn</i> ... ..	291
<b>Stars—atmospheres of</b>	
An attempt to detect a corona around $\beta$ Orionis with an intensity interferometer using linearly polarized light, <i>R. Hanbury Brown, J. Davis and L. R. Allen</i> ... ..	93
<b>Stars—binary</b>	
W Ursae Majoris: mass-ratio discrepancy, third body and age, <i>John Whelan, Stefan W. Mochnacki and Simon P. Worden</i> ... ..	31
The system of $\alpha$ Crucis, <i>A. D. Thackeray and Graham Hill</i> ... ..	55
Radiation pressure driven mass loss from accretion discs in X-ray binaries, <i>D. T. Wickramasinghe</i> ... ..	297
Tidal interaction and the orbital period of Cen X-3, <i>J. E. Pringle</i> ... ..	13P
Probable symbiotic and VV Cephei stars in the Magellanic Clouds, <i>M. W. Feast and B. Louise Webster</i> ... ..	31P
<b>Stars—chemical composition of</b>	
Abundance analysis of Przybylski's star (HD 101065), <i>G. Wegner and A. D. Petford</i> ... ..	557

**Stars—clusters of**

- UBV photometry of bright stars and variables in the globular cluster NGC 6723, *John Menzies* 177  
 The physical properties of the red giants in M67, *Wayne Osborn* ... 291  
 A colour-magnitude diagram of NGC 6752, *A. J. Wesselink* ... 345

**Stars—magnetic fields in**

- Magnetic stars with a slow meridional circulation, *D. L. Moss* ... 61  
 The adiabatic stability of stars containing magnetic fields—III. Additional results for poloidal fields, *P. Markey and R. J. Tayler* ... 505

**Stars—photometry of**

- Visual spectrophotometry of early-type stars, *J. Davis and R. J. Webb* ... 163  
 UBV photometry of bright stars and variables in the globular cluster NGC 6723, *John Menzies* ... 177  
 JHKL photometry of LMC stars, *I. S. Glass* ... 249  
 UBV photometry of southern early-type stars at intermediate galactic latitudes, *P. W. Hill, D. Kilkeny and I. G. van Breda* ... 451  
 Strömgren four-colour observations of Cygnus X-1 and Hercules X-1, *R. W. Hilditch and Graham Hill* ... 543  
 The extinction curves of HD 92964 and HD 147889, *I. G. van Breda, I. S. Glass and D. C. B. Whittet* ... 551

**Stars—spectroscopy of**

- Spectroscopic studies of flare stars: EV Lac, EQ Peg, AD Leo and V1054 Oph, *Bernard W. Bopp* ... 255

**Stars—structure and evolution of**

- The site of the helium flash revisited, *Peter Russell Owen* ... 53  
 The evolution of the Wolf-Rayet features of the slow nova, RR Telescopii, *A. D. Thackeray and B. Louise Webster* ... 101

**Stars—variable**

- The evolution of the Wolf-Rayet features of the slow nova, RR Telescopii, *A. D. Thackeray and B. Louise Webster* ... 101  
 Variations of S Dor and HDE 269006, *A. D. Thackeray* ... 221  
 Observations of rapid blue variables—XIV. Z Chamaeleontis, *Brian Warner* ... 235  
 Spectroscopic studies of flare stars: EV Lac, EQ Peg, AD Leo and V1054 Oph, *Bernard W. Bopp* ... 255  
 Accurate positions and optical studies in nine southern pulsar fields, *A. E. Vaughan, M. J. Disney and P. Nicholson* ... 361  
 The evolution of viscous discs and the origin of the nebular variables, *D. Lynden-Bell and J. E. Pringle* ... 603

**Stars—velocities of**

- Photoelectric radial velocities—I. Technique, *G. W. van Citters* ... 469

**Sun**

- On the possibility of detecting photospheric polarization with an interferometer, *D. C. Sams and I. D. S. Johnston* ... 463  
 Solar limb and disk continuum intensities in the wavelength region 1450–1950 Å, *C. Jordan and A. Ridgeley* ... 533

**Ultraviolet astronomy**

- Solar limb and disk continuum intensities in the wavelength region 1450–1950 Å, *C. Jordan and A. Ridgeley* ... 533

**X-ray astronomy**

- A new type of crystal spectrometer for solar X-ray studies, *R. C. Catura, E. G. Joki, J. C. Bakke, C. G. Rapley and J. L. Culhane* ... 217  
 Radiation pressure driven mass loss from accretion discs in X-ray binaries, *D. T. Wickramasinghe* ... 297  
 The X-ray spectrum of Cygnus-A, *M. S. Longair and A. P. Willmore* ... 479  
 Strömgren four-colour observations of Cygnus X-1 and Hercules X-1, *R. W. Hilditch and Graham Hill* ... 543  
 Tidal interaction and the orbital period of Cen X-3, *J. E. Pringle* ... 13P

MONTHLY NOTICES  
OF THE  
ROYAL ASTRONOMICAL SOCIETY

CONTAINING  
PAPERS PUBLISHED IN THE PERIOD  
1974 OCTOBER TO DECEMBER

VOL. 169

Published for the Royal Astronomical Society by  
Blackwell Scientific Publications  
Oxford London Edinburgh Melbourne

## SUBJECT INDEX

	PAGE
<b>Abundances of the elements</b>	
Evidence on the evolution of s-process abundances in the interstellar medium, <i>P. J. Huggins and P. M. Williams</i> ... ..	1P
<b>Astrometry</b>	
Measurements of the position of X-ray sources with <i>Copernicus</i> , <i>A. P. Willmore, K. O. Mason, P. W. Sanford, F. J. Hawkins, Paul Murdin, M. V. Penston and Margaret J. Penston</i> ...	7
Dependence of catalogue corrections on errors of satellite observations, <i>Carol Ann Williams</i>	133
<b>Celestial mechanics</b>	
The obliquity of the ecliptic two millennia ago, <i>R. R. Newton</i> ... ..	331
Classical solution of the two-body problem if the gravitational constant diminishes inversely with the age of the Universe, <i>John P. Vinti</i> ... ..	417
A theory of the motion of Iapetus, <i>A. T. Sinclair</i> ... ..	591
<b>Galactic structure and stellar dynamics</b>	
The age-dependence of the local stellar velocity distribution, <i>John Byl</i> ... ..	157
<b>Galactic centre</b>	
Detection of ionized neon in the galactic centre, <i>David K. Aitken, Barbara Jones and James M. Penman</i> ... ..	35P
<b>Galaxies</b>	
Effects of supernovae on the early evolution of galaxies, <i>Richard B. Larson</i> ... ..	229
Broadband optical and infrared observations of Seyfert galaxies, <i>M. V. Penston, Margaret J. Penston, R. A. Selmes, E. E. Becklin and G. Neugebauer</i> ... ..	357
The Bautz-Morgan classification of clusters containing radio galaxies, <i>Ian M. McHardy</i> ...	527
Forbidden iron lines in NGC 4151, <i>H. Netzer</i> ... ..	579
High resolution observations of neutral hydrogen in M31—I. The overall distribution, <i>D. T. Emerson</i> ... ..	607
Radio emission of NGC 5128 at $\lambda = 1.35$ cm, <i>Pierre Kaufmann, E. Scalise, P. Marques dos Santos and W. G. Fogarty</i> ... ..	15P
<b>General relativity</b>	
Integral image produced by gravitational-lens effect, <i>R. C. Wayte</i> ... ..	1

**Infrared astronomy**

- Infrared observations of young stars—V. The faint members of the Orion population, *Martin Cohen* ... 257
- Broadband optical and infrared observations of Seyfert galaxies, *M. V. Penston, Margaret J. Penston, R. A. Selmes, E. E. Becklin and G. Neugebauer* ... 357
- Ten micron observations of globular clusters, *Martin Cohen and William M. Fawley* ... 31P
- Detection of ionized neon in the galactic centre, *David K. Aitken, Barbara Jones and James M. Penman* ... 35P
- Nebulosity associated with the powerful infrared and radio source G333-6-0-2, *J. Churms, M. W. Feast, I. S. Glass, G. A. Harding, T. Lloyd Evans and W. L. Martin* ... 39P

**Instruments and techniques**

- The transfer function, signal-to-noise ratio, and limiting magnitude in stellar speckle interferometry, *J. C. Dainty* ... 631

**Intergalactic medium**

- Intergalactic dust, *K. Nandy, D. C. Morgan and V. C. Reddish* ... 19P

**Interstellar medium**

- The interstellar medium in the direction of the Gum nebula, *W. M. Burton, R. G. Evans and W. G. Griffin* ... 307
- Evidence on the evolution of s-process abundances in the interstellar medium, *P. J. Huggins and P. M. Williams* ... 1P

**Magellanic Clouds**

- Electronographic photometry of star clusters in the Magellanic Clouds—V. The colour-magnitude diagram of NGC 1866, *Merle F. Walker* ... 199
- A spectral type-colour anomaly for long period cepheids in the Magellanic Clouds, *M. W. Feast* ... 273
- Variable stars in the Large Magellanic Cloud—III, *E. M. Lindsay* ... 343
- A photoelectric magnitude sequence in the LMC: 0501-6728, *R. P. Olowin, T. G. Hawarden and P. R. Warren* ... 577

**Nebulae—gaseous**

- Observations of the supernova remnant HB21 at 1.4 GHz, *I. E. Hill* ... 59
- The structure of ionization fronts in H II regions, *Edward G. Schmidt* ... 97
- Interferometric observations of the structure of main-line OH sources, *P. J. Harvey, R. S. Booth, R. D. Davies, D. C. B. Whittet and W. McLaughlin* ... 545
- Detection of ionized neon in the galactic centre, *David K. Aitken, Barbara Jones and James M. Penman* ... 35P
- Nebulosity associated with the powerful infrared and radio source G333-6-0-2, *J. Churms, M. W. Feast, I. S. Glass, G. A. Harding, T. Lloyd Evans and W. L. Martin* ... 39P
- Copernicus: the X-ray structure of the Crab nebula, *F. J. Hawkins, K. O. Mason, P. W. Sanford and J. L. Culhane* ... 41P
- Aperture synthesis of the formaldehyde absorption in the direction of W3, *J. B. Whiteoak, D. H. Rogstad and I. A. Lockhart* ... 59P

**Neutron stars**

- Magnetohydrodynamic instabilities in neutron stars, *G. Channugam* ... 353

**Photometry—non-stellar**

- Broadband optical and infrared observations of Seyfert galaxies, *M. V. Penston, Margaret J. Penston, R. A. Selmes, E. E. Becklin and G. Neugebauer* ... 357

**Physical processes**

- The structure of ionization fronts in H II regions, *Edward G. Schmidt* ... 97
- On the force associated with absorption of spectral line radiation, *John I. Castor* ... 279
- Magnetohydrodynamic instabilities in neutron stars, *G. Channugam* ... 353
- A 'twin-exhaust' model for double radio sources, *R. D. Blandford and M. J. Rees* ... 395
- The accretion model of dwarf novae with application to Z Chamaeleontis, *G. T. Bath, W. D. Evans, J. Papaloizou and J. E. Pringle* ... 447

**Polarization of starlight**

- Polarimetry in the emission lines of shell stars, *V. George and S. J. Coyne* ... 7P

	PAGE
<b>Radio astronomy</b>	
Observations of the supernova remnant HB21 at 1.4 GHz, <i>I. E. Hill</i> ...	59
The polarization of radio sources at $\lambda$ 31 cm, <i>P. Haves, R. G. Conway and D. Stannard</i> ...	117
A 'twin-exhaust' model for double radio sources, <i>R. D. Blandford and M. J. Rees</i> ...	395
Observations of 48 extragalactic radio sources with the Cambridge 5-km telescope at 5 GHz, <i>G. G. Pooley and S. N. Henbest</i> ...	477
The Bautz-Morgan classification of clusters containing radio galaxies, <i>Ian M. McHardy</i> ...	527
Interferometric observations of the structure of main-line OH sources, <i>P. J. Harvey, R. S. Booth, D. C. B. Whittet and W. McLaughlin</i> ...	545
High resolution observations of neutral hydrogen in M31—I. The overall distribution, <i>D. T. Emerson</i> ...	607
Radio emission of NGC 5128 at $\lambda = 1.35$ cm, <i>Pierre Kaufmann, E. Scalise, P. Marques dos Santos and W. G. Fogarty</i> ...	15P
Nebulosity associated with the powerful infrared and radio source G333.6-0.2, <i>J. Churms, M. W. Feast, I. S. Glass, G. A. Harding, T. Lloyd Evans and W. L. Martin</i> ...	39P
Aperture synthesis of the formaldehyde absorption in the direction of W3, <i>J. B. Whiteoak, D. H. Rogstad and I. A. Lockhart</i> ...	59P
<b>Spectroscopy</b>	
Collision strengths for the electron-impact excitation of certain highly-ionized helium-like ions, <i>Michael Jones</i> ...	211
On the force associated with absorption of spectral line radiation, <i>John I. Castor</i> ...	279
Forbidden iron lines in NGC 4151, <i>H. Netzer</i> ...	579
The ionization equilibrium of hydrogen-like to argon-like ions of elements, <i>Hugh P. Summers</i> ...	663
<b>Stars</b>	
Optical observations of stars near Copernicus X-ray positions, <i>Paul Murdin, Margaret J. Penston, M. V. Penston, I. S. Glass, P. W. Sanford, F. J. Hawkins, K. O. Mason and A. P. Willmore</i> ...	23
Observations of stars near X-ray sources, <i>B. Louise Webster</i> ...	53P
<b>Stars—angular diameters of</b>	
The transfer function, signal-to-noise ratio, and limiting magnitude in stellar speckle interferometry, <i>J. C. Dainty</i> ...	631
<b>Stars—atmospheres of</b>	
Theoretical colours for F and G supergiants, <i>R. A. Bell and Sidney B. Parsons</i> ...	71
The source functions of some strong lines in late-type stellar atmospheres, <i>R. A. E. Fosbury</i> ...	147
J, H, K, L photometry and models of G to M giants, <i>R. M. Catchpole and I. S. Glass</i> ...	69P
<b>Stars—binary</b>	
The binary systems of 14 Cephei and 2 Lacertae, <i>R. W. Hilditch</i> ...	323
HD 153919 = 2U 1700-37, <i>E. N. Walker</i> ...	47P
The primary of Cen X-3, <i>D. T. Wickramasinghe, N. V. Vidal and M. S. Bessell</i> ...	63P
<b>Stars—clusters of</b>	
Photographic <i>UBV</i> photometry of the globular cluster NGC 5927, <i>John Menzies</i> ...	79
Electronographic photometry of star clusters in the Magellanic Clouds—V. The colour-magnitude diagram of NGC 1866, <i>Merle F. Walker</i> ...	199
NGC 6259: Southern image of M11, <i>T. G. Hawarden</i> ...	539
Ten micron observations of globular clusters, <i>Martin Cohen and William M. Fawley</i> ...	31P
<b>Stars—magnetic fields in</b>	
The growth and decay of sunspots, <i>F. Meyer, H. U. Schmidt, N. O. Weiss and P. R. Wilson</i> ...	35
Magnetohydrodynamic instabilities in neutron stars, <i>G. Channugam</i> ...	353
The decentred dipole model for magnetic stars, <i>M. J. Stift</i> ...	471
<b>Stars—photometry of</b>	
Theoretical colours for F and G supergiants, <i>R. A. Bell and Sidney B. Parsons</i> ...	71
Photographic <i>UBV</i> photometry of the globular cluster NGC 5927, <i>John Menzies</i> ...	79
Electronographic photometry of star clusters in the Magellanic Clouds—V. The colour-magnitude diagrams of NGC 1866, <i>Merle F. Walker</i> ...	199
Blue band photometry of Cygnus X-1 during 1973, <i>E. N. Walker and Angel Rolland Quintanilla</i> ...	247

	PAGE
A spectral type-colour anomaly for long period cepheids in the Magellanic Clouds, <i>M. W. Feast</i> ... ..	273
NGC 6259: Southern image of M11, <i>T. G. Hawarden</i> ... ..	539
A photoelectric magnitude sequence in the LMC: 0501-6728, <i>R. P. Olowin, T. G. Hawarden and P. R. Warren</i> ... ..	577
<i>J, H, K, L</i> photometry and models of G to M giants, <i>R. M. Catchpole and I. S. Glass</i> ...	69P
<b>Stars—spectroscopy of</b>	
The source functions of some strong lines in late-type stellar atmospheres, <i>R. A. E. Fosbury</i>	147
Photoelectric measures of the hydrogen lines in early-type stars, <i>Alejandro Feinstein</i> ...	171
<b>Stars—variable</b>	
Effects of supernovae on the early evolution of galaxies, <i>Richard B. Larson</i> ... ..	229
A spectral type-colour anomaly for long period cepheids in the Magellanic Clouds, <i>M. W. Feast</i> ... ..	273
Variable stars in the Large Magellanic Cloud—III, <i>E. M. Lindsay</i> ... ..	343
The accretion model of dwarf novae with application to Z Chamaeleontis, <i>G. T. Bath, W. D. Evans, J. Papaloizou and J. E. Pringle</i> ... ..	447
The light variation of $\iota$ Monocerotis, <i>R. R. Shobbrook and R. S. Stobie</i> ... ..	643
<b>Sun</b>	
The growth and decay of sunspots, <i>F. Meyer, H. U. Schmidt, N. O. Weiss and P. R. Wilson</i>	35
The stability of a solar model to non-radial oscillations, <i>J. Christensen-Dalsgaard, F. W. W. Dilke and D. O. Gough</i> ... ..	429
Solar neutrinos and rotation—a caution, <i>J. J. Monaghan</i> ... ..	13P
<b>Ultraviolet astronomy</b>	
The interstellar medium in the direction of the Gum nebula, <i>W. M. Burton, R. G. Evans and W. G. Griffin</i> ... ..	307
<b>X-ray astronomy</b>	
Measurements of the position of X-ray sources with <i>Copernicus</i> , <i>A. P. Willmore, K. O. Mason, P. W. Sanford, F. J. Hawkins, Paul Murdin, M. V. Penston and Margaret J. Penston</i> ...	7
Optical observations of stars near <i>Copernicus</i> X-ray positions, <i>Paul Murdin, Margaret J. Penston, M. V. Penston, I. S. Glass, P. W. Sanford, F. J. Hawkins, K. O. Mason and A. P. Willmore</i> ... ..	23
Blue band photometry of Cygnus X-1 during 1973, <i>E. N. Walker and Angel Rolland Quintanilla</i>	247
The 34.85-day cycle of Her X-1, <i>P. J. N. Davison and A. C. Fabian</i> ... ..	27P
<i>Copernicus</i> : the X-ray structure of the Crab Nebula, <i>F. J. Hawkins, K. O. Mason, P. W. Sanford and J. L. Culhane</i> ... ..	41P
HD 153919 = 2U 1700-37, <i>E. N. Walker</i> ... ..	47P
Observations of stars near X-ray sources, <i>B. Louise Webster</i> ... ..	53P
The primary of Cen X-3, <i>D. T. Wickramasinghe, N. V. Vidal and M. S. Bessell</i> ... ..	63P
Is $\mu$ Columbae the X-ray source 3U 0545-32?, <i>Keith O. Mason and Philip A. Charles</i> ...	73P
